

ROVINCE

ADVENTURE WEAR

FACTSHEET

Dear Rovince Customer,

Nothing is as valuable as our health, as we at Rovince know all too well. Since 2009 we have been developing and producing clothing with a unique added value; durable protection against tick bites! In the past 10 years we have become an authority in the field of insect repellent clothing, and our clothing is worn by a wide variety of professional groups. However, people who encounter ticks while taking a walk or walking the dog also praise our clothing.

As the tick problem increases year after year, the need for a standard for (work) clothing with protection against tick bites has grown.

In cooperation with, and under the direction of the NEN and other stakeholders (including Ministry of Defense, RIVM and Stigas), the standard "NEN-8333" was published in the spring of 2018. This standard describes technical requirements, quality tests and conditions of use with which both long-term operation against tick bites and the health of the wearer of the clothing can be guaranteed.

A European harmonized standard is currently being worked on from Brussels. The publication of this standard is expected in 2023 at the earliest.

TICKS ARE EVERYWHERE NOT JUST IN THE FOREST

27.000
RECORDED LYME INFECTIONS PER YEAR

SINCE 2009 A RECOGNIZED OCCUPATIONAL DISEASE

COMMUNITY COSTS PER YEAR
€ 20 MLN.

90% LESS CHANCE OF DRAWING BITES THROUGH PROTECTIVE CLOTHING (RESEARCH GERMAN DEFENSE)

IN 60% OF THE URBAN CENTERS SURVEYED, TICKS WERE FOUND

SINCE 2018 THE STANDARD NEN-8333 IS IN FORCE IT SHOULD HELP EVERY EMPLOYEE PROTECT AGAINST TICK BITES

20% OF TICKS IN THE NETHERLANDS ARE INFECTED WITH THE BORRELIA BACTERIA (CAUSES LYME)

CAPS

The insect-resistant Ergoline collection laid the foundation for Rovince 10 years ago. This collection was developed from hunting, and later picked up by various government organizations. The Ergoline collection is therefore suitable not only for recreational purposes such as hunting, trekking, nature photography or, for example, fishing.

The Ergoline collection is also very widely applicable as clothing to work in. The entire Ergoline collection has a modern fit, is robust and is very comfortable to wear.

CAP ERGOLINE

Item number: 102.001

Permanent insect repellent treatment
Treatment up to 100 washes active
COMPLIANT WITH NEN - 8333
UV 50+ protection
Windproof

Color: olive green

MATERIAL

- 50% Polyester
- 50% Cotton

Size range:
M/L & XL/XXL

Unisex

PARIKAS

JACKET ERGOLINE

Item number: 105.001 & 105.002

- Wind- and waterproof membrane
- Light wearing comfort
- Various functional pockets
- Napoleon pocket
- Soft collar
- Anti-insect
- NEN-8333
- EN-17487
- Stepped lining

Color: olive green

MATERIAL

- 50% Polyester/50% Cotton
- Fabric Weight: 220 gr/m²
- Membrane: Sympatex
- Water column 10.000 mm

Size range:
Men: S t/m 4XL
Women: XS t/m 2XL

Men & Women

SOFTSHELL JACKS

SOFTSHELL ERGOLINE

Item number: 112.002

- Wind- and waterproof membrane
- Light wearing comfort
- Various functional pockets
- Napoleon pocket
- Soft collar
- Anti-insect
- NEN-8333
- EN-17487

Color: olive green

MATERIAL

- 50% polyester - 50% cotton
- Sympatex membrane
- Water column 10,000mm

Unisex

Size range:
Men: S t/m 4XL
Women: XS t/m 2XL

SOFTSHELL WORKERLINE

Item number: 112.001

Permanent insect repellent treatment
 Treatment up to 100 washes active
 Wind and waterproof Membrane
 COMPLIANT WITH NEN-8333
 Stretch fabric
 Ventilation with zipper under the armpits
 Good breathability
 Two zippered side pockets
 1 zippered chest pocket and inner zippered pocket
 Waist adjustable with drawcord
 Cuffs adjustable with velcro

Color: black

MATERIAL

- 95% Polyester
- 5% Spandex
- Fabric Weight: 300 gr/m²

Size range:
S t/m 4XL

Unisex

SOFTSHELL SAFETYLINE

Item number: 112.003

Functional 3-layer Stretch softshell
 Insect repellent impregnation active up to 100 washes
 Standardized according to ENISO-20471
 COMPLIANT WITH NEN-8333
 Wind and waterproof Membrane
 Good breathability
 3M reflection
 Ventilation under the armpits
 Two zippered side pockets,
 1 chest pocket and inside zipped pocket
 Waist adjustable with drawcord
 Cuffs adjustable with velcro

Color: orange with gray

MATERIAL

- 95% Polyester
- 5% Spandex
- Fabric Weight: 300 gr/m²

Size range:
44 t/m 64

Unisex

FLEECE JACKS

COARSE FLEECE

Item number: 106.003, 106.004, 106.005 & 106.006

YKK front zippers
Rear venting, front windproof

- 2% Elastane

Size range:
35-38, 39-42, 43-46

Unisex

Private label

In addition to the Rovince collections from stock, we also have a private label program. For years Rovince has very good production sites in both Europe and the Far East.

Because of these different production locations, we are able to start a private label order from 50 to 100 pieces. The program consists of knitted and woven garments in all imaginable colors and sizes. Delivery times of our private label program range from 8 to 20 weeks. Our core business is insect repellent clothing but our private label program is also available for all other qualities.

Some industries we have made private label orders for are:

- Construction
- Logistics
- Food
- Automotive

We would be happy to make an appointment with you to discuss your private label request, non-binding of course.

Standards and certification

General

In recent decades, no product has been so frequently (scientifically) tested and studied as clothing impregnated with permethrin. Especially from Germany, several scientific studies have been published that cover both the effectiveness of permethrin and any health risks. The most recent publication is from 2017, in which the German "Bundesinstitut für Risikobewertung" considers permethrin (if applied correctly) to be not "sensitive".

NEN-8333

This is a national Dutch standard that sets requirements for factory-made permethrin-treated body-covering clothing that helps protect against tick bites. The standard concerns covering clothing, where the textile is factory treated with the fabric permethrin, after which covering clothing is made from it. The covering clothing as such helps to protect against tick bites, the treatment with permethrin is an additional element for this protection.

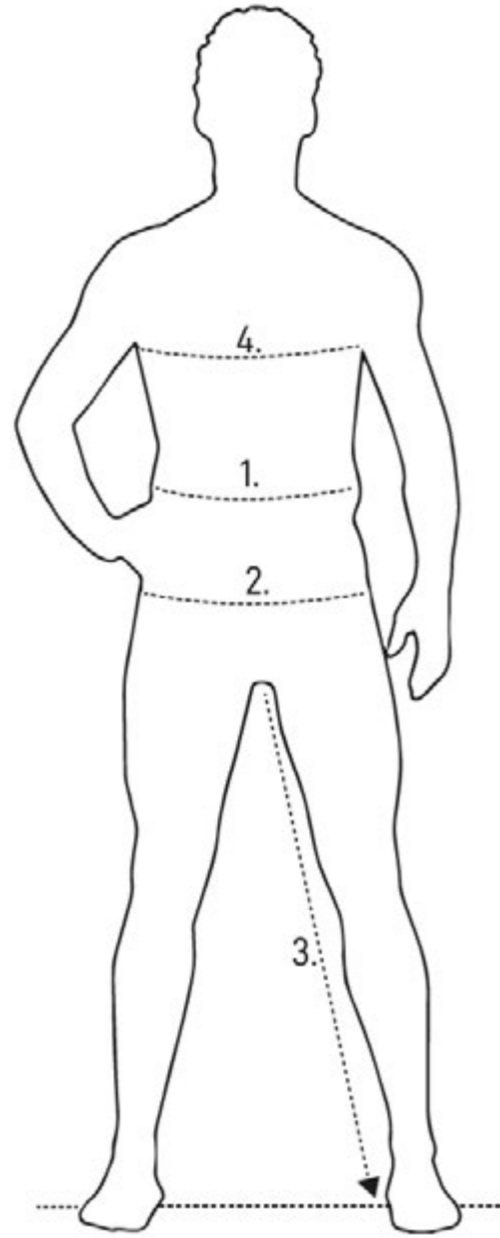

Dermatest

The company Dermatest GmbH is a research institute in the field of dermatology. They work closely with scientists at the Universities of Paris and Bilbao, who specialize in skin care. Once every two years we have our permethrin finish dermatologically tested and evaluated by Dermatest GmbH. Also for the next two years we have again received the certificate "Very Good".

Oekotex

The Oeko-Tex standard is a testing and certification system for textiles that guarantees that the chemicals used throughout the production process are not harmful or dangerous to human health or the environment. With all of our fabrics we as Rovince use in our clothing we can present the Oeko-tex certificate.

Scientific studies and certificates can be requested from Rovince.

- 1:
Regular waistband (see visual above). Measure waist circumference horizontally.
- 2:
Hip circumference. Measure horizontally around the hip circumference at the widest part. The hip measurement is important in women's pants.
- 3:
Inseam. Measure vertical from crotch to ground (bare feet).
- 4:
Chest circumference. Measure horizontally the chest circumference around the widest part.
